

(A) Method Performance vs Heterogeneity

(B) Method Selection Guide

Scenario	k	I^2	Recommended Method
Small, homogeneous	10-20	<25%	PET-PEESE (cautious)
Medium, homogeneous	20-50	<50%	PET-PEESE (primary)
Medium, heterogeneous	20-50	$\geq 50\%$	MAIVE (if $F > 10$)
Large, homogeneous	≥ 50	<50%	PET-PEESE + trim-fill
Large, heterogeneous	≥ 50	$\geq 50\%$	MAIVE + PET-PEESE
